

BCA Circular

28 May 2021

Dear Members,

Encouraging adoption of the COVID-Safe Platform

The BuildSG-COVIDSafe Platform (CSP) offers a streamlined collection of attendance data for worksites. It features an integrated solution to administer the necessary information (i.e. Whitelist record, Temperature record, AccessCode check, Health Declaration, SafeEntry submission) for SMM purposes with just one facial scan. The database is secured (i.e. IM8 compliant), hence users can be assured of best-in-class practices in data management. CSP shall help to strengthen the SMM regime of the worksites and allay the current manual practices.

BCA strongly encourages all REDAS members to adopt CSP for their respective projects. The signing up (by main contractors) can be done via the assigned solution providers by IMDA given below. Eligible firms may also apply for the Advanced Digital Solutions (ADS) funding support to defray the implementation cost. Do note that ADS funding support is available for a limited time only. You may refer to the [CSP webpage](#) for more details.

CAPPS SOLUTIONS PTE LTD	Name: Andrew Chen / Eilen Yeo Email: contact@capps.com.sg Contact: 6509 0309 URL: www.capps.com.sg/products/insightqse
