

Developing Smart Buildings with Green Technologies and EV Charging

WORKSHOP OVERVIEW

How do you play a part in supporting the 2030 Agenda for Sustainable Development Goals in managing climate change, with a remit that covers commercial, residential and even national needs? This session will share with you how smart digital solutions can enable you to drive towards Super Low Energy Buildings (SLEB) as well as transition to sustainable mobility via EV ecosystem.

LEARNING OUTCOME

- Smart digital solutions for utilities management;
- Microclimate control system towards green buildings;
- Differences between EV installation for commercial and private residential properties;
- Fleet solutions for EV.

KNOWLEDGE PARTNERS

Mr Dean Cher
Head, Mobility, Sustainable Energy Solutions, SP Group

Dean heads the Mobility business at SP Group (SP) which is focused on developing a nationwide electric vehicle charging network across Singapore. SP aims to catalyse the growth and adoption of sustainable transportation in the country, and currently operates the largest public EV charging network in Singapore.

Dean's predominant experience has been in the Commodities sector where he has had over a decade of experience working with all types of companies in the commodities value chain, ranging from oil majors, banks and producers. Prior to joining SP, his last 2 designations were as Chief Operating Officer at both a commodities trading company and with a US investment bank.
