

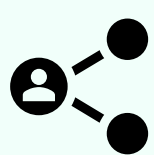

# Mapping of Delivery Waiting Bay Locations

## What is the mapping initiative about?

To help delivery personnel locate delivery waiting bays more easily, the Urban Redevelopment Authority (URA) and National Delivery Champions Association (NDCA) crowdsourced data, and worked with the Singapore Land Authority (SLA) and industry partners to publish the locations of delivery waiting bays on [OneMap](#). In future, the delivery waiting bay locations could be shared with other service providers to integrate with their applications, to facilitate safe and efficient pick-up and drop-off by delivery personnel.

## How will the Delivery Waiting Bay information be used?

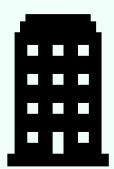

The information collated by NDCA may be shared with URA, SLA and relevant third parties such as navigation application companies, for purposes such as:

- Displaying delivery waiting bay locations on OneMap (publicly accessible)
- Providing delivery waiting bay locations as API for businesses and service providers to integrate with their applications

## How do I implement Delivery Waiting Bays at my development?

Refer to the [Advisory Note to Facilitate Safe and Efficient Delivery Pick-Ups at Commercial Malls](#) for best practices to implement delivery waiting bays in safe and conducive locations.

## I have Delivery Waiting Bays at my development. How do I share this information?

You can share the delivery waiting bay locations with NDCA to enable delivery personnel to locate them on OneMap or other relevant platforms. Please refer the contact information below.

## Contact us and share your development's Delivery Waiting Bay locations

For queries on this mapping initiative and data sharing, please contact the NTUC-affiliated National Delivery Champions Association [ndca@ntuc.org.sg](mailto:ndca@ntuc.org.sg).
